Reviewer(s)' Comments to Author:
Reviewer: 1

Recommendation: Major Revision

Comments:

1. Why conducting this study in Lombok Island was important? Please add a brief background why elderly in the island need the intervention.
2. The authors did not explain about the randomisation methods. Please explain how the participants were randomised.
3. The authors only mentioned the instruments used without give detailed descriptions about them. Please explain more about the instruments.
4. As there were several outcomes included, please indicate which outcomes are the primary and secondary.
5. Explain the sample size calculation process.

Reviewer: 2

Recommendation: Minor Revision

Comments:

Thank you for submitting this interesting research. Please see my comments below?

1. The authors need to explain why cognitive behaviour therapy as an intervention for elderly
2. According to the discussion, in the third paragraph, the authors said "This study provides evidence that there was a tendency for improvement in the quality of life of respondents after the TF-CBT intervention in all four aspects. " Please explain more about the aspects.
3. May need to revise conclusion to accurately reflect findings. The suggestion should not only strengthen the family, but also the role of other parties
